

TRAINING AT TRANSPO2024

Transpo2024 is providing lots of opportunities to get specialized training. In addition to three days of presentations by your peers, there are training sessions before and after the Conference.

On Sunday afternoon from 1:00 to 3:00, James Landini, PE, of FDOT's Central Office, Alexandra Lopez, PE, FDOT District Four, and Jill Capelli, PE, Kimley Horn will provide training on Systems Engineering. Then Pete Yauch, PE, PTOE, of Iteris will provide an update on the new MUTCD and PROWAG. This will occur from 3:30 to 5:00.

After the Conference, stick around and Wednesday afternoon from 1:30 to 5:00, ITS America will provide Connected and Automated Vehicle Education (CAVE)-in-a-box Training.

So there are lots of chances to extend your conference, learn something, and pick up a few PDHs. You can register for any of this training at <https://cvent.me/mBgL8A>. If you have already registered for the event, make sure to just modify your registration.

Please let SandyBeck@TampaBay.rr.com know if you need assistance.
